

The stunning master suite featured on the front cover of the 2007 Home & Remodel magazine is the beautiful creation of Shawn Hyland and Justin Souers of Hyland Cabinetworks Inc.

The turret portion of this master suite created a curvy opportunity for Hyland cabinetworks, along with contractor Tom Braaten Construction, to display their creativity and skill.

Specializing in custom design, Hyland Cabinetworks chose to create contemporary his and hers matching vanities made of rich African Ribbon Mahogany. Stainless steel handles and feet are a perfect compliment to the deep dark color, along with the open areas created to provide easy access to lush thick towels. The design is further enhanced by stylish granite

countertops and awesome vessel sinks with wall mounted faucets. Toes will stay toasty on the heated Travertine floors. Finishing touches include hanging pendant lights, coordinating wall sconces, and a heavy mirrored frame.

The Hylands have been in business for more then 30 years. Their business philosphy is simple; "Listen carefully to customers and provide them with a quality, finished product to enjoy for years to come."
